

# INVITATION TO EXHIBITORS

MSV 2015

57th International  
Engineering Fair

**AUTOMATIZACE**

Measuring, control,  
automation and regulation  
technology

7th International Fair  
for Transport and Logistics

International Fair  
for Environmental  
Protection Technologies

September 14–18, 2015

Brno – Czech Republic

[www.bvv.cz/msv](http://www.bvv.cz/msv)

BVV

Veletrhy  
Brno

## **New markets, new contacts, new business opportunities, networking**

- The largest industrial trade fair in Central Europe – 1,600 exhibitors, 75,000 visitors
- High internationality – 57% of exhibitors, 10% of registered visitors come from abroad
- High-quality visitor structure, 70% are decision makers
- Big business benefits for exhibitors – participation in the fair is seen by exhibitors as one of the most important marketing tools
- Perfect platform for presentation of small and medium-sized companies – 87% of exhibitors are companies up to 250 employees
- Strong promotion and media support – 350 accredited journalist from the Czech Republic and abroad
- Attractive supporting programme of expert conferences and seminars, discussion forums

**The fair is held under the auspices of**

Confederation of Industry  
of the Czech Republic

Czech Chamber  
of Commerce

MSV 2014

IMT 2014

## Facts and Figures 2014

**1,636 exhibiting companies from 31 countries**

**944 foreign exhibitors, i.e. 57.7%**

**The greatest foreign participants:**

Germany 281 companies, Slovakia 84 companies,  
China 72 companies, Italy 71 companies, Austria  
36 companies, Switzerland 34 companies

**76,155 visitors from 53 countries**

**7,487 from abroad, i.e. 9.8%**

– mostly from Slovakia, Poland, Germany, Russia,  
Austria, Hungary and Italy

**70% of visitors decide on investment**

**MSV 2014**

## Exhibitors

### **Participation in MSV significantly helps industrial companies**

- Most exhibitors consider their participation in MSV as one of the most important marketing tools
- 36% of exhibitors closed or began dealings on export contracts
- 93% confirm the significant business value of their trade fair participation

### Evaluation of participation

**64% of exhibitors evaluate the visitors as the right clientele**

**69% of exhibitors were satisfied with the participation in the fair**

**74%** of exhibitors are going to take part in the next year's fair

*More information on [www.bvv.cz/msv](http://www.bvv.cz/msv)*

*Sources: Market research from Ipsos Tambor. Details are taken from the registration of trade visitors.*

## MSV 2014

### Visitors

**70%** of visitors decide or participate in decisions on investment

**73%** of visitors are regular guests to the fair  
**22%** are new customers

### Evaluation of visit

**74%** of visitors were satisfied with exhibited products

**82%** were satisfied with the visit to the fair

**81%** were satisfied with the presence of important companies in the industry

**72%** were satisfied with the number of the exhibited novelties

**78%** are willing to come to the next year's fair

# Reaction to the fair

## **Luboš Jiráček, Commercial and Technical Manager, DK machinery**

The fair has definitely picked up compared to last year. I mean it from the perspective of both exhibitors and visitors, as considerable quantities of them visited our stand. For our company, this is the only trade fair of its kind in the Czech and Slovak Republics, which has its sound reputation and its quality level, it is worth attending. This year's MSV changed the situation and raised the level considerably. Moreover, our company can not afford not to visit Brno, it is necessary in terms of competition. We have also held preliminary talks on new contracts in Brno, our exhibits are sold for millions of Crowns. We are satisfied with the fair.

## **Radek Šildberger, Sales Representative, Fronius Česká republika**

This year's attendance and complete trade fair participation is evaluated as satisfactory. This year we were in a different hall than last year and we have feedback from our customers that they would have rather found us in the same location, which did not work out this year. We had a lot of new recruits and existing customers, who were mainly interested in our novelties, such as a rechargeable welder that can weld outside the grid, and more.

## **Josef Mikloš, Sales Director and Managing Director, Gühring**

We have been participating in MSV regularly since 1991. We are satisfied with this event each year. We are large manufacturers of rotary chip tools for machining. Attendance at our stand was excellent throughout the fair. The exhibition was of great benefit for the company this year. Some companies, however, still show that they are afraid to invest, even though the fair shows them that it is a good way to invest properly. I think that this trade fair does make sense. We have been selling our products at an outdoor stand this year, we sold more than three million worth.

## **Peter Kunák, Head of Sales in CZ and SK, Hoffmann Group**

This trade fair is a key event of the year for our company. We organize business meetings with partners in Brno, because we are the largest European manufacturer of tools. It has had positive significance for our company, we are sure to participate next year.

### **Dominik Tesař, Salesman, INCOTECH**

This year's MSV is on a higher level than last year. Our stand was visited by many people who were interested in machines and new technologies. I think that the engineering sector begins to gain strength after the past years of stagnation. We had a number of business meetings, we will evaluate the interest in our products in the coming period, some deals have been initiated. Our company is attending the fair for the first time and we are very happy, our exhibition presents Turkish machinery. I drew earlier findings about MSV from my previous engagement in another company where I worked for many years.

### **Karel Šilhánek, area manager, ISCAR ČR**

The Engineering Fair in Brno shows signs of revival in engineering. Visitor attendance was much greater than in previous years. I can confirm that, because our company has been participating in this prestigious event for many years. The company benefited from establishing contracts with new customers. We have of course made use of our presence in Brno as always for meetings with existing clients.

### **Jiří Musil, Business Manager, KÄRCHER**

The fair was very successful for our company. We have held preliminary talks about twenty new contracts in Brno, which we will evaluate only after the fair. We were visited by a number of potential customers and as always, we have used Brno for business meetings with existing clients.

### **Martin Volný, Marketing Manager, KOVOSVIT MAS**

The trade fair in Brno is our annual meeting place with our customers. I evaluate its progress positively this year, a little bit better in terms of attendance and interest than last year. We are exhibiting our two flagships at our stand – the vertical five-axis MCU 700 centre and the multifunctional Multicut 500 centre, we also have robotized work station and an interesting historical exhibit, the first multifunctional centre in the world the MCSY 80.

### **Bohumír Blažek, CEO, KUBOUŠEK**

It is still early for an evaluation from a business perspective, but we are satisfied in terms of organization and facilities provided by BW, as well as with the attendance. There was an increase in comparison with the previous year, both in Hall G1, where we are exhibiting injection technology, and in Hall F, where we have our measuring technology.

### **Radek Velebil, Sales Representative, KUKA Roboter CEE for the CR and SR**

We traditionally meet with our partners at MSV and every year they are presented some new product. For us, the Brno trade fair is the most natural place of concentrated demand, where we are able to cover a substantial portion of our customers in terms of information during the five days. We assume that this form of communication and presentation brings us business effect, even if it is very difficult to trace accurately in our business. I am sure that next year we will again come back with something new.

### **Štěpán Hřivna, Executive, Next Metrology Software**

We won the Gold Medal for the TouchDMIS software designed for coordinate measuring machines of several types, which is unique in that it can be controlled by touch. I would like to say that I appreciate this award very much, it is a big prize for us and also a big challenge, because we would like to become a technology company which comes from the Czech Republic and which will export products all over the world.

### **Radomír Kubík, Marketing and Sales, PBT Rožnov p. R.**

The fair has met our expectations, it means that our stand was visited by many customers not only from the field of electrical engineering, but also from other fields. We are exhibiting X-ray equipment and various devices for accurate measurement at our stand. We belong to the traditional MSV participants, this year's new contacts look promising. Enterprises have again begun to release investment funds and are buying things. We can say that this year has been our best MSV ever. There was great interest in our European novelty – a CT device and other X-ray equipment.

### **Petr Mašek, Executive, Pilon**

The International Engineering Fair was already good last year, but this year there was huge traffic at our exhibition stand. There was interest in the saw with automatic material feed, while CNC machines are the trend this year. I would say that there was a great revival in engineering. It paid off for us that we have been busy developing new machines in the past years during the recession. After six lean years sales simply started running full speed ahead, which was very visible at the Brno trade fair.

### **Karl Stelc, Sales Representative, Stema-Tech**

We as a company are satisfied with the fair, a lot of customers visited us, we even managed to sell three Japanese Amada machines directly at the fair. They are two lasers and a grinder. As usual, we held a series of business meetings with existing customers in Brno, but new customers interested in our exhibits also came. Next year we will attend the fair again, we have been exhibiting regularly since 1991.

### **Michele Tajariol, CEO of TAJMAC-ZPS**

The overall level of this year's trade fair is good, as was the case in the last few years. Attendance is great, also customers' mood is good, since as I have heard, they are currently implementing many new projects. The fair is very well organized and I see a lot of students and young people, that is those who will guarantee work in the field also in the future, which is very positive. I have been to fairs in Germany and Italy, and I have not met so many young people there.

### **Karel Pich, Technical Director, Executive, TOPMES**

The company is satisfied with its participation in the fair, not only in terms of the number of visitors who visited our stand. We made many new contacts and revived the old. We are delighted to have won the MSV Gold Medal for the first touch software in the world measuring with a coordinate measuring technology. The award will improve our image and customer trust in our products. We will certainly capitalize the Gold Medal in our promotional materials.

### **Milan Chludil, Sales Representative, TRIMILL**

I can say on behalf of our company that we are satisfied. The number of visitors at our booth was good, we met many of our existing customers who know our machines and with whom we focused on the outlook and their readiness for the future. I personally found it very nice that many students from our engineering sector came by. The BVV Trade Fairs Brno have mastered everything on the organizational level – and I say with more than a decade of experience of visiting these fairs.

### **Jiří Kunert, Chairman of the Board and CEO, UniCredit Bank**

Have been coming here for six years and we like returning to MSV to reaffirm our position as one of the leaders in export financing and services for corporate clients. We are close to our clients who

either exhibit or come as visitors here. We hold important meetings and extend our cooperation with existing and new clients, whom we help to keep existing markets and conquer new ones.

**Jiří Skuhra, Business Group Director,  
VÍTKOVICE MACHINERY GROUP**

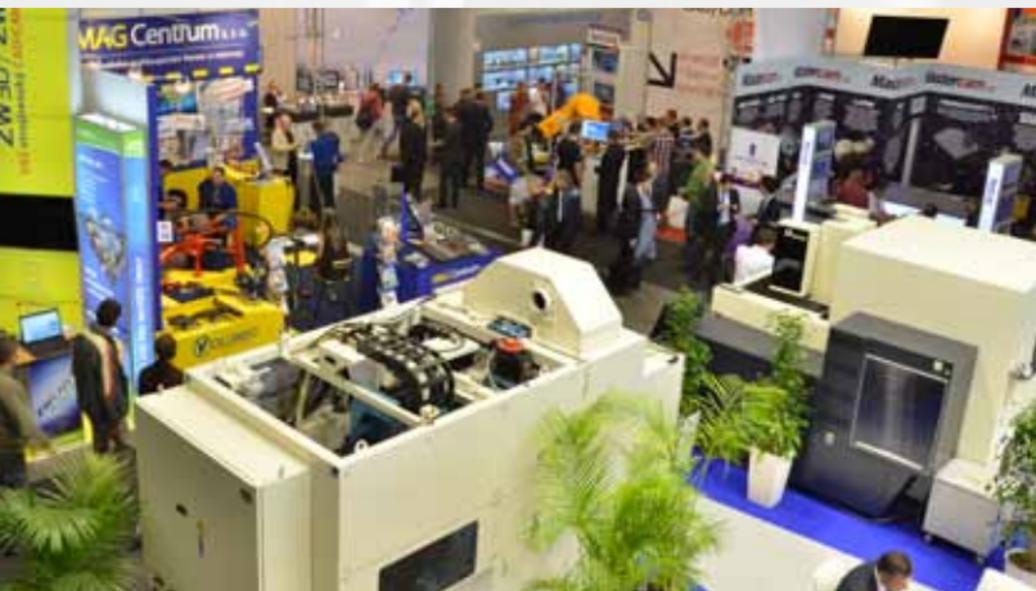

For the first time in history we are exhibiting in the outdoor area outside the traditional Hall P. The open space gives us the opportunity to introduce exhibits of significant volume, such as a bridge element that will go to Bratislava for assembly immediately after the fair, or a crankshaft for two-stroke marine engines. We are showing the visitors complete novelties in IT. Great attention has been enjoyed by the e-call system, which proves that if a car crashes and has this system, it can call for help by itself and thus save the driver.

**Bohumil Malý, Head of Technical Department,  
Vzduchotechnik**

One could see a significant recovery in all directions at this year's fair. The exhibitions contained a lot of novelties and there was a lot interested in them. As for our company, we have a lot of demand for our products which we will deal with immediately after the fair. Moreover, we even sold one large industrial exhauster directly at the fair. The company is completely satisfied with the trade fair.

**Miroslav Šabart, CEO, ŽĐAS,  
President of the Association of Engineering Technology**

Who does not exhibit at the International Engineering Fair, is as they did not exist.

## International Fair for Environmental Protection Technologies

**NEW**

### Principal fields

Air-conditioning equipment • Pumping stations • Chemical and physical water treatment • Technology for sewage water treatment plants • Chemical and physical purification of sewage waters • Sewage water treatment plants • Waste processing and utilization • Soil and landscape protection • Environment-friendly technologies for industry • Removal of old environmental burden • Instrumentation for environment control • Machines for industrial cleaning and washing • Research, services, literature, environmental organizations

### Ecological technology at MSV 2014

#### **23 exhibiting companies from 4 countries**

Czech Republic, China, France and Germany

#### **39% from abroad**

The most exhibitors presented the fields: air-conditioning equipment, technologies for water treatment, waste processing and utilization and machines for industrial cleaning and washing.

## MSV 2015

### **Mining, metallurgical, ceramic and glass engineering, the foundry industry**

Machines and equipment for geological prospecting • Machines and equipment for open cast mines and pits • Machines working and processing raw minerals • Equipment for metallurgical plants, steel works, rolling mills and for manufacturing ferrous and non-ferrous metals • Machines and equipment for the ceramic and glass industries • Foundry equipment • Melting plant equipment • Patterns, core boxes, permanent moulds, moulds • Casting machines and equipment • Castings

### **Materials and components for mechanical engineering**

Metallurgical semi-products, forgings, pressings, work pieces • Connecting materials, fittings, products of wire • Steel and tube structures • Apparatuses, vessels, tanks • Glass and technical ceramic products, carbon components • Seals, bearings • Gears, clutches, brakes, lubricating technology

### **Drives, hydraulics, pneumatics, cooling technology, air-conditioning**

Electric and mechanical drives, engines • Compressors, pneumatic elements, airconditioning equipment • Cooling equipment • Driers • Hydraulic elements and systems • Fittings, pipelines, tanks, pumps

### **Plastics, rubber, composites, chemicals for engineering**

Polymers • Composite materials • Machines and equipment for plastics and rubber processing • Semi-finished and finished plastic and rubber-based products • Machinery and accessories for the chemical industry • Equipment for the chemical industry • Lubricants, oils, coating compositions, cements, adhesives • Chemicals for industrial production

### **Metal-working and forming machines, tools, welding, surface technology**

Machine tools • Forming machines • Flexible manufacturing systems (FMS) • Measuring and checking instruments for machining and forming • Precision tools • Hand-operated tools • Welding machinery and equipment • Thermal spray machinery and equipment • Additional and auxiliary materials • Welded structures, subsupplies of welded parts • Electroplating equipment • Lacquering systems, enamelling systems, plastic coating systems • Coating materials, putties, thinners, solvents • Laser and plasma coating technologies

## **Power engineering, heavy-current electrical engineering**

Primary sources for power engineering • Industrial boilers and their accessories • Motors, cogeneration units • Turbines • Nuclear power engineering • Cables and conductors • Electrotechnical insulators and insulants • Power capacitors, accumulators • Electric light supplies • Transducers, rectifiers, electric current distribution frames, transformers • Uninterruptible power supplies • Electric HV and VHV instruments • Electric motors, rotary current supplies • Electric industrial heating • Electric drives

## **Electronics, automation, measuring technology**

Electronic components and elements • Control, automation and regulation technology • IT, system integration • Measuring and laboratory technology • Studio and broadcasting technology • Machinery and equipment for electrical engineering

## **Offer of industrial real estates and localities, regional development**

**NEW**

Land planning • Programmes for regional development • Business and investment activities • Technology parks, business centres, free trade areas • Offer of development localities for industrial construction • Offer of industrial real estates • Demand for investors • Financial institutions • Project financing

## **Research, development, transfer of technologies, financial and other services**

Science and research • Financial services • Standards, certificates, tests, design • Marketing, advertising and promotional services • Literature, technical information • Organisation, institutions, schools

## **3D Digital Technology**

Conference and exhibition showing results of 3D printing technology use in practise. Presentation of advanced technologies for more efficient development of prototypes and production attended by the most important suppliers of 3D technology in the global market.

## The main topic of MSV 2015

# AUTOMATIZACE

**Measuring, control, automation  
and regulation technology**

Partner

Czech and Moravian  
Electrical and Electronic  
Association

**Presentation of industrial automation across all industrial branches of MSV – 8<sup>th</sup> year of the specialized project**

### Benefits for exhibitors of automation technology

- Visibility of automation within the MSV portfolio
- Emphasis on automation in MSV promotion and publicity
- Targeted professional MSV visitors reached with information on industry news and trends in industrial automation
- Competition for the best exhibit in the field of automation (MSV Gold Medal)
- Attractive supporting programme of conferences – vision in automation, automation as a tool for cost reduction and efficient use of all resources, raw materials and energy

### Automation 2014 in Figures:

230 exhibiting companies from 12 countries

28% from abroad

Display of electronics, automation and measuring technology was visited by 9.4% of registered visitors in the course of MSV 2014.

**Technology and Innovation  
Transfer 2015 – 7<sup>th</sup> year**

- Presentation of scientific and research activities of universities, research centres and other entities for their use in industry
- Offers of capacity in science and research to industrial companies, demonstration of research projects in practice
- Favourable conditions of participation

### Technology Transfer 2014

**Participants:** Czech Technical University in Prague, Slovak Technical University in Bratislava, University of West Bohemia in Pilsen, Brno University of Technology, Technology Agency of the Czech Republic, Czech-German Chamber of Industry and Commerce

## 7<sup>th</sup> International Fair for Transport and Logistics

### Comprehensive system solutions in transport and logistics

- Held concurrently with MSV – the unique potential represented by future clients and new contacts and deals
- Support from prestigious trade associations and federations from the Czech Republic and abroad
- A high-quality supporting programme of trade conferences and seminars

### Principal fields

Traffic engineering • Handling equipment • Storage equipment • Assembly machinery and devices • Packaging materials, packaging technology • Services for transport • Telematics, communication, information and control systems for logistics • Research and development, engineering and design, services for logistics

### Supported by

Czech Logistics  
Association

Association of Forwarding  
and Logistics of the  
Czech Republic

# Transport and Logistics 2011

**129 exhibitors from 12 countries**  
**49 foreign exhibitors, i.e. 38%**

## **The greatest foreign participations:**

Germany 21 companies, Slovakia 8 companies

5% of the total number of 79,296 visitors came with an overriding interest in the Transport and Logistics fair. The fair was visited by a total of 18,920 registered visitors.

<b>Visitors' interest in presented sectors</b>	<b>(%)</b>
Handling equipment	26
Storage equipment	16
Assembly machinery and devices	23
Packaging materials, packaging technology	13
Services for transport	6
Telematics, communication, information and control systems for logistics	6
Research and development, engineering and design services in logistics	10

Register on-line!

**Applications Deadline: March 31, 2015**

Electronic application form

**MSV 2010–2014 and Transport and Logistics 2009–2011 exhibitors**

will receive an e-mail with a link to their individual electronic application form with basic data already completed.

**New exhibitors**

Electronic application form available at  
**[www.bvv.cz/e-application.msv](http://www.bvv.cz/e-application.msv)**

# Prices

## Exhibition space

indoors – ground floor	4,850 CZK/sq m
indoors – gallery	3,700 CZK/sq m
outdoor areas	2,200 CZK/sq m

## Registration fee

exhibitor	11,000 CZK
co-exhibitor	11,000 CZK

## Additional fees for free sides

corner stand	30%
U-stand	40%
island stand	60%

Additional fees for free sides are charged for covered and open areas up to 100 sq m. For metres exceeding 100 sq m additional fees are not charged.

## Deadline bonus (-10%)

Exhibitors will be granted a 10% reduction of the standard price for the exhibition space if they register by **March 31, 2015** and settle the first advance invoice at maturity. The reduction will be implemented in the final invoice. Deadline bonus does not apply to Hall P.

# The Brno Exhibition Centre

**BVW Trade Fairs Brno – a leading European organizer of prominent B2B events.**

- Hosts 50 trade fairs and exhibitions annually, most of them are the leading shows in the Czech Republic.
- Organizes over 24 fairs of international calibre, which are prominent trade events in Central Europe.
- Registers over 1 million visitors and 12,500 exhibitors occupying 450,000 sq m (4,843,918.19 sq ft) of net exhibition space annually.
- Occupies a site on 672,000 sq m (7,233,347 sq ft).
- Provides world class exhibition halls and outdoor exhibition area of 203,522 sq m (2,055,906 sq ft).
- Exhibition halls are equipped with A/C and WiFi internet.
- Accommodates 25,000–30,000 visitors a day (maximum up to 60,000).

## Brno – The Trade Fair Capital

**With its superior infrastructure and excellent services, Brno has proved to be the ideal location for MSV**

- Located between Prague and Bratislava. Brno is acknowledged as the “The Trade Fairs Capital”.
- In the Czech language, the city of Brno is synonymous with exhibitions. No wonder that 90% of the Czech population relate the city to exhibitions and trade shows.
- Brno is the Czech Republic’s No. 2 business city – a city of commerce, logistics, and education. The city’s six universities make Brno a knowledge hub for IT, biotech and medical research.
- Conveniently located, Brno is within easy reach of 5 Central European capitals: Prague, Vienna, Bratislava, Budapest, Ljubljana, and southern Poland.
