

Pro – Tek Max N

(certified acc. to EN 469:2005)

The PTM is safe, lightweight, breathable and innovative. One of the most lightweight garments in the marketplace, yet still one of the strongest on safety.

Highlights:

The suits assembly consists of a three layer system with spacer-dots-technology, that offers the greatest performance, comfort and protection delivering an optimized solution to minimize physiological loading and heat stress.

The outer shell is a 260g/m² Nomex III A providing excellent fire-blocking and mechanical strength. The PUDOTS-moisture barrier provides an additional air-cushion with help of its spacer-dots. It makes the garment lightweight and safe.

Outershell:	Nomex® III Antistatic, approx. 260 g/m ²
Moisture barrier:	PUDOTS® combined heat and moisture barrier, approx. 170 g/m ²
Heat barrier:	
Lining:	50% Nomex® / 50% Viscose FR, approx. 125 g/m ²
Total weight:	Approx. 555 g/m ²

Size-Range of all items:
Double-sizes 42/44 – 62/64,
available in short (K) and
long (L) version, too.

Jacket – ECF122122:

- Underarm gussets to allow free movement of the arms without the jacket 'riding up'.
- Ergonomic seam placement at the elbow area allows natural movement of the elbow.
- The shoulder and elbow areas are padded with flame resistant foam for greater comfort.
- Jacket contains two concealed map pockets under the storm flap.
- Left hand side radio pocket and right hand side torch loop attachments on the front chest area.
- Lower front concealed pockets and flaps with grasp tab.
- All external seams twin needled for extra strength.
- Internal pocket attached to the lining.
- Anti wicking at body and sleeve hems.

Trouser – ETF200022:

- High waisted trouser design to incorporate greater protection to the lower back kidney area when carrying out day to day operations.
- Ergonomic seam placement at the knee area allows natural movement of the leg.
- Knee pads are covered in Kevlar®-based Arashield. Specifically designed to increase the mobility of the knee, so providing increased comfort for the firefighter.
- Side thigh pockets allows items such as gloves to be safely stored within the ensemble
- Each pocket is covered by a flap with a grasp tab for easy grip when the firefighter is wearing gloves.
- The lower back leg hem has been specially designed with a scalloped section removed to reduce wear and tear of the heel area.
- Trouser incorporates waist adjustments for a more comfortable and bespoke fit.
- Front fly opening with a protective flap closed by Velcro.
