BASIC INFORMATION

ITTE 2013 is one day international professional conference divided into three sections accompanied by live demonstration and simulation test area with professional workshop and table-top exhibition of partner's solutions and products. The conference is a professional accompanying program of international defense fair IDET 2013

The conference will be held in Pavilion E, BVV Fair ground, Brno, Czech Republic.

The conference is aimed primarily at the security and information community of the public sector, army and security forces, the academia and private business cooperating in projects of public interest. The conference is focused on developing international cooperation in cyber security in Europe, with special focus on the Czech Republic, Slovak Republic, Hungary and Poland.

It is expected that about 200+ professionals from fifteen mostly European countries will participate, including representatives from NATO, NATO NCIA and NATO Cooperative Cyber Defense Centre of Excellence Tallinn.
