SILVA REGINA – A MESSENGER OF NEW TRENDS

The SILVA REGINA International Forestry and Hunting Fair is an important showcase of the forestry industry and game keeping not only in the Czech Republic, but throughout the Central European region. Modern forestry equipment and the latest technology are presented at this trade fair. The accompanying programme and the 2018 exhibition will highlight forest protection by its economic use, and sustainability. The hunting part will present hunting weapons and ammunition, equipment for hunters and foresters, trophies and taxidermy. In the jubilee year 2018, we will recall, in the context of hunting and forestry, the 100 years' anniversary of the Czech Republic and 90 years since the opening of the Brno Exhibition Centre.

MEETING OF FORESTERS AND GAMEKEEPERS

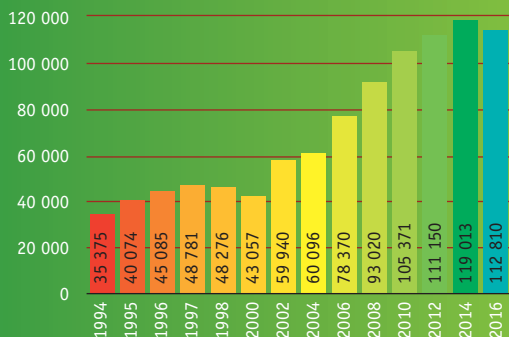

SILVA REGINA is not only a business opportunity and a specialist event but also a community meeting point for professionals and all those who have something in common with the forest. This encounter is unique for its atmosphere and programme.

112,810 visitors from 48 countries visited the agrarian and forestry fairs TECHAGRO, ANIMAL VETEX, SILVA REGINA and BIOMASS in 2016.

The SILVA REGINA fair was the main target for eighteen percent of visitors.
