BIOMASS - Solutions to current problems in forest biomass processing

Local and renewable energy sources are becoming increasingly important. The use of biomass is an opportunity for energy conservation and targeted care for nature.

The BIOMASS fair has shaped itself as a substantial presentation platform for technologies using wood mass energy. Also in 2022, this theme will be crucial, especially in connection with high current supply of firewood. In conjunction with the traditional TECHAGRO and SILVA REGINA agricultural and forestry exhibitions, the BIOMASS fair is a logical extension to daily activities of farmers and foresters, creating new jobs.

The basic pillar of BIOMASS is the use of wood mass

Other topics of BIOMASS include biogas transformations in agriculture, biogenic motor fuels and cycle of mass, nutrients and energy.

New business opportunities

48 exhibitors from 6 countries present themselves at the BIOMASS exhibition.

The exhibition area is **3.347 m²**.

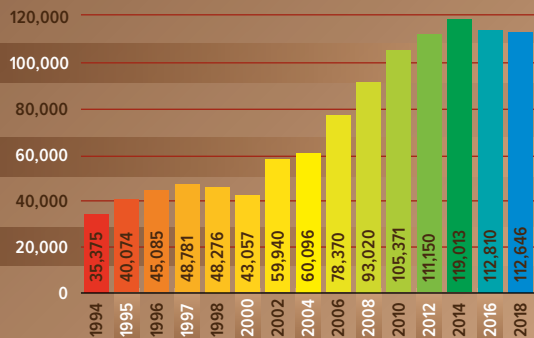

BIOMASS, together with the other concurrent fairs, will fill up all halls and outdoor exhibition areas of the Exhibition Centre in Brno.

Meeting of professionals

In 2018, the BIOMASS, SILVA REGINA and TECHAGRO agrarian fairs were attended by **112,646 visitors from 39 countries of the world**. Show them your new products, innovative solutions and modern services!

Development of attendance 1994 - 2018

Co-organizers

AGROINTEG s.r.o.

DŘEVO–PRODUKT SV, spol.s r.o.

Ministry of Agriculture of the Czech Republic

Mendel University in Brno

Agricultural Engineering Research Institute
