## SILVA REGINA – Forest protection through its economic use

The SILVA REGINA International Forestry and Hunting Fair is an important showcase for the forestry and hunting sector not only in the Czech Republic, but in the entire Central European region. The expo features modern forestry equipment and the latest technologies. The extra programme and exhibitions of the 2024 season will emphasize the topic of forest protection through its economic use, as well as sustainability, response to climate changes and the bark beetle infestation. The hunting section will feature hunting weapons and ammunition, equipment for hunters and foresters, trophies and taxidermy.

## Meeting of foresters and hunters

**112,646 visitors from 39 countries** visited the **TECHAGRO, SILVA REGINA** and **BIOMASA** agriculture and forestry fairs in 2018.

SILVA REGINA is not only a business opportunity and a specialised event, but also a community meeting of professionals and all those who associated their lives with the forest. This meeting has a unique atmosphere and programme. In 2022, SILVA REGINA and BIOMASA were held without the agricultural part – the TECHAGRO fair. In that year, SILVA REGINA and BIOMASA were visited by 25,635 visitors from 13 countries.

## New trade opportunities

**In 2018, TECHAGRO, SILVA REGINA and BIOMASA fairs were attended by 750 exhibitors, the fairs took an exhibition area of 88,189 square metres.**

In 2022, the SILVA REGINA and BIOMASA fairs were held without the agricultural part of the shows, i.e. TECHAGRO. The Brno Exhibition Centre hosted 154 exhibitors presenting themselves on an area of 11,220 sqm. The size of the SILVA REGINA and BIOMASA fairs in 2022 was the same as in the previous years with TECHAGRO.
